## Alternative environmental solutions

Tuesday, 23 May 2006

When a van, bus or truck suffers major engine damage, the first reaction of most businesses is to buy a new vehicle. In some cases while this might make sense, often it's simply not necessary, and may become a very expensive proposition.

Don't trade. Upgrade! - we can re-power your vehicle in an environmentally friendly way.

Leyland Olympians repowered with Iveco Euro 3 engine and exhaust emission system.
